PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

(a) Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.

(b) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.

(c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the: (1) door (bent), (2) hinges and latches (broken or loosened), (3) door seals and sealing surfaces.

(d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

CONSUMER LIMITED WARRANTY

SHARP ELECTRONICS CORPORATION warrants to the first consumer purchaser that this Sharp brand product (the "Product"), when shipped in its original container, will be free from defective workmanship and materials, and agrees that it will, at its option, either repair the defect or replace the defective Product or part thereof with a new or remanufactured equivalent at no charge to the purchaser for parts or labor for the period(s) set forth below.

This warranty does not apply to any appearance items of the Product nor to the additional excluded item(s) set forth below nor to any Product the exterior of which has been damaged or defaced, which has been subjected to misuse, abnormal service or handling, or which has been altered or modified in design or construction.

In order to enforce the rights under this limited warranty, the purchaser should follow the steps set forth below and provide proof of purchase to the servicer.

The limited warranty described herein is in addition to whatever implied warranties may be granted to purchasers by law. ALL IMPLIED WARRANTIES INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR USE ARE LIMITED TO THE PERIOD(S) FROM THE DATE OF PURCHASE SET FORTH BELOW. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

Neither the sales personnel of the seller nor any other person is authorized to make any warranties other than those described herein, or to extend the duration of any warranties beyond the time period described above on behalf of Sharp.

The warranties described herein shall be the sole and exclusive warranties granted by Sharp and shall be the sole and exclusive remedy available to the purchaser. Correction of defects, in the manner and for the period of time described herein, shall constitute complete fulfillment of all liabilities and responsibilities of Sharp to the purchaser with respect to the Product, and shall constitute full satisfaction of all claims, whether based on contract, negligence, strict liability or otherwise. In no event shall Sharp be liable, or in any way responsible, for any damages or defects in the Product which were caused by repairs or attempted repairs performed by anyone other than an authorized servicer. Nor shall Sharp be liable or in any way responsible for any incidental or consequential economic or property damage. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion may not apply to you.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

Your Product Model Number & Description: R-2110J Home Use Microwave Oven. (Be sure to have this information available when you need service for your Product.)

Warranty Period for this Product: One (1) year parts and labor in-home service. The warranty period continues for an additional six (6) years, for a total of seven (7) years, with respect to the magnetron tube in the Product for parts only. Labor and the servicer trip charge are not provided free of charge for this additional period.

Additional Item(s) Excluded from Warranty Coverage (if any): Non-functional accessories and light bulbs.

Where to Obtain Service: From a Sharp Authorized Servicer located In the United States. Be sure to have Proof of Purchase available. For in-home service, the servicer will come to the unit's location. If it is necessary to remove the unit for repair, the servicer will reinstall the unit at no extra charge, provided it was installed according to Sharp’s Installation Instructions. To find the location of the nearest Sharp Authorized Servicer, call Sharp toll free at 1-800-BE-SHARP (1-800-237-4277).

TO OBTAIN SUPPLY, ACCESSORY OR PRODUCT INFORMATION, CALL 1-800-BE-SHARP OR VISIT www.sharpusa.com.

SAVE THE PROOF OF PURCHASE AS IT IS NEEDED SHOULD YOUR OVEN EVER REQUIRE WARRANTY SERVICE.

PRODUCT INFORMATION CARD

The product information card should be completed within ten days of purchase and returned. It is necessary to write the model and serial numbers, found on the nameplate in the oven cavity, on the product information card. We will keep it on file and help you access the information in case of loss, damage or theft. This will also enable us to contact you in the unlikely event that any adjustments or modifications are ever required for your oven.
IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances basic safety precautions should be followed, including the following:

**WARNING** - To reduce the risk of burns, electric shock, fire, injury to persons or exposure to excessive microwave energy:

1. **READ ALL INSTRUCTIONS BEFORE USING THE APPLIANCE.**
2. Read and follow the specific “PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY” on inside front cover.
3. This appliance must be grounded. Connect only to properly grounded outlet. See “ELECTRICAL GROUNDING INSTRUCTIONS” on page 7.
4. Install or locate this appliance only in accordance with the provided installation instructions.
5. Some products such as whole eggs and sealed containers—for example, closed glass jars—are able to explode and should not be heated in this oven.
6. Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat, cook or dry food. It is not designed for industrial or laboratory use.
7. As with any appliance, close supervision is necessary when used by children.
8. Do not operate this appliance if it has a damaged cord or plug, if it is not working properly or if it has been damaged or dropped.
9. This appliance should be serviced only by qualified service personnel. Contact nearest Sharp Authorized Servicer for examination, repair or adjustment.
10. Do not cover or block any openings on the appliance.
11. Do not store or use this appliance outdoors. Do not use this product near water—for example, near a kitchen sink, in a wet basement or near a swimming pool, or similar locations.
12. Do not immerse cord or plug in water.
13. Keep cord away from heated surfaces.
14. Do not let cord hang over edge of table or counter.
15. See door surface cleaning instructions on page 30.
16. To reduce the risk of fire in the oven cavity:
   a. Do not overcook food. Carefully attend appliance when paper, plastic or other combustible materials are placed inside the oven to facilitate cooking.
   b. Remove wire twist-ties from paper or plastic bags before placing bag in oven.
   c. If materials inside the oven should ignite, keep oven door closed, turn oven off and disconnect the power cord or shut off power at the fuse or circuit breaker panel.
   d. Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils or food in the cavity when not in use.
17. Liquids, such as water, coffee or tea are able to be overheated beyond the boiling point without appearing to be boiling. Visible bubbling or boiling when the container is removed from the microwave oven is not always present. THIS COULD RESULT IN VERY HOT LIQUIDS SUDDENLY BOILING OVER WHEN A SPOON OR OTHER UTENSIL IS INSERTED INTO THE LIQUID.
   To reduce the risk of injury to persons:
   a. Do not overheat the liquid.
   b. Stir the liquid both before and halfway through heating it.
   c. Do not use straight-sided containers with narrow necks. Use a wide-mouthed container.
   d. After heating, allow the container to stand in the microwave oven at least for 20 seconds before removing the container.
   e. Use extreme care when inserting a spoon or other utensil into the container.
18. Clean ventilation openings and grease filters frequently—Grease should not be allowed to accumulate on ventilation openings, louver or grease filters.
19. Use care when cleaning the louver and the grease filters. Corrosive cleaning agents, such as lye-based oven cleaners, may damage the louver and the grease filters.
20. When flaming food under the hood, turn the fan on.
21. This appliance is suitable for use above both gas and electric cooking equipment 36” wide or less.

UNPACKING AND INSTALLATION INSTRUCTIONS

UNPACKING AND EXAMINING YOUR OVEN

Open the bottom of the carton, bend the carton flaps back and tilt the oven over to rest on plastic foam pad. Lift carton off oven and remove all packing materials, WALL and TOP CABINET TEMPLATES. SAVE THE CARTON AS IT MAY MAKE INSTALLATION EASIER.

1. Remove the feature sticker from the outside of the door, if there is one.
2. Check to see that there is a WALL TEMPLATE and TOP CABINET TEMPLATE. Read enclosures and SAVE the Operation Manual.

Check the oven for any damage, such as misaligned or bent door, damaged door seals and sealing surfaces, broken or loose door hinges and latches and dents inside the cavity or on the door. If there is any damage, do not operate the oven and contact your dealer or SHARP AUTHORIZED SERVICER. See Installation Instructions for more details.

INSTALLATION INSTRUCTIONS

Please read all instructions thoroughly before installing the Over the Range Microwave Oven/Hood System. Two people are recommended to install this product.

If a new electrical outlet is required, its installation should be completed by a qualified electrician before the Microwave Oven/Hood is installed. See 3 ELECTRICAL GROUNDING INSTRUCTIONS on page 7.

1 MOUNTING SPACE

This Microwave Oven/Hood requires a mounting space on a wall as shown in Figure 1. It is designed to be used with standard 12-inch wall cabinets.

There needs to be least 2 inches from the top of the range backsplash to the bottom of the over the range.

If the space between the wall cabinets is 36 or 42 inches, a Filler Panel Kit can be used to fill the gap. The metal filler panels come in 3-inch wide pairs. One set is needed for a 36-inch opening and 2 sets for a 42-inch opening. The Filler Panel Kit should be installed before the Microwave Oven/Hood is installed. See page 14 for ordering informations.

2 WALL CONSTRUCTION

This Microwave Oven/Hood should be mounted against and supported by a flat vertical wall. The wall must be flat for proper installation. If the wall is not flat, use spacers to fill in the gaps. Wall construction should be a minimum of 2" x 4" wood studding and 3/8" or more thick dry wall or plaster/lath. The mounting surfaces must be capable of supporting weight of 110 pounds—the oven and contents—AND the weight of all items which would normally be stored in the top cabinet above the unit.

The unit should be attached to a minimum of one 2" x 4" wall stud.

To find the location of the studs, one of the following methods may be used:

A. Use a stud finder, a magnetic device which locates the nails in the stud.
B. Use a hammer to tap lightly across the mounting surface to find a solid sound. This will indicate stud location.

The center of the stud can be located by probing the wall with a small nail to find the edges of the stud and then placing a mark halfway between the edges. The center of any adjacent studs will normally be 16" or 24" to either side of this mark.
UNPACKING AND INSTALLATION INSTRUCTIONS

3 ELECTRICAL GROUNDING INSTRUCTIONS

This appliance must be grounded. This oven is equipped with a cord having a grounding wire with a grounding plug. It must be plugged into a wall receptacle that is properly installed and grounded in accordance with the National Electrical Code and local codes and ordinances. In the event of an electrical short circuit, grounding reduces risk of electric shock by providing an escape wire for the electric current.

WARNING - Improper use of the grounding plug can result in a risk of electric shock.

Electrical Requirements

The oven is equipped with a 3-prong grounding plug. DO NOT UNDER ANY CIRCUMSTANCES CUT OR REMOVE THE GROUNDING PIN FROM THE PLUG.

The Power Supply Cord and plug must be connected to a separate 120 Volt AC, 60 Hz, 15 Amp, or more branch circuit, single grounded receptacle. The receptacle should be located inside the cabinet directly above the Microwave Oven mounting location as shown in Figure 2.

NOTE:

1. If you have any questions about the grounding or electrical instructions, consult a qualified electrician or serviceperson.

2. Neither Sharp nor the dealer can accept any liability for damage to the oven or personal injury resulting from failure to observe the correct electrical connection procedures.

Radio or TV Interference

Should there be any interference caused by the microwave oven to your radio or TV, check that the microwave oven is on a different electrical circuit, relocate the radio or TV as far away from the oven as feasible or check position and signal of receiving antenna.

4 HOOD EXHAUST DUCT

When the hood is vented to the outside, a hood exhaust duct is required. All ductwork must be metal; absolutely do not use plastic duct. Check that all connections are made securely. Please read the following carefully:

Exhaust connection: The hood exhaust has been designed to connect to a standard 3-1/4” X 10” rectangular duct. If round duct is required, a rectangular-to-round adapter must be used.

Rear exhaust: If a rear or horizontal exhaust is to be used, care should be taken to align the exhaust with the space between the studs, or wall should be prepared at the time it is constructed by leaving enough space between wall studs to accommodate exhaust.

Maximum duct length: For satisfactory air movement, the total duct length of 3-1/4” X 10” rectangular or 6” diameter round duct should not exceed 140 feet.

Elbows, adapters, wall caps, roof caps, etc. present additional resistance to air flow and are equivalent to a section of straight duct which is longer than their actual physical size. When calculating the total length, add the equivalent lengths of all transitions and adapters plus the length of all straight duct sections. Figure 3 shows the approximate feet of equivalent length of some typical ductwork parts. Use the values in parentheses for calculating air flow resistance equivalent, which should total less than 140 feet.

5 TOOLS RECOMMENDED FOR INSTALLATION

- Phillips Screwdriver
- Electric Drill
- 1/2", 5/8" and 3/32" Drill Bits
- 1-1/2" Wood Bit or Metal Hole Cutter (if metal cabinet is used)
- Saw to cut exhaust opening (if needed)
- Protective Drop Cloth for product and range - you may also use carton for protection
- Scissors
- Pencil
- Measure
- Tape

6 INSTALLATION HARDWARE

The INSTALLATION HARDWARE items 1 - 7 are in a small bag. Items 8 - 11 are packed separately. All items are in a small carton packed below the oven.

UNPACKING AND INSTALLATION INSTRUCTIONS

7 PREPARATION OF THE OVEN

1. Turn oven on the side. See Figure 5.
2. Follow steps (A)-(D) to remove mounting plate from the back of the oven as shown in Figure 5.
   (A) Release mounting plate by pulling out the lever that is on the bottom of the oven. See Figure 6.
   (B) When lever is out, pull that side of the mounting plate away from the oven. See Figure 5.
   (C) Repeat step (A) on other side.
   (D) Repeat step (B) on other side.
8 VENTILATION SYSTEM (PREPARING OVEN FOR INSTALLATION)

This Microwave Oven/Hood is designed for adaptation to three types of hood ventilation systems. Select the type required for your installation.

- **Recirculating** — non-vented, ductless. Follow installation procedure (A). Recirculating requires the use of the Charcoal Filter, which has already been installed in the oven.
- **Horizontal Exhaust** — outside ventilation. Follow installation procedure (B).
- **Vertical Exhaust** — outside ventilation. Follow installation procedure (C).

**A) RECIRCULATING: Non-Vented, Ductless Operation**
The unit is shipped assembled for recirculating.

**NOTE:**
1. The Exhaust Damper Assembly is not required for recirculating operation.
2. The Charcoal Filter should be replaced every 6 to 12 months, depending on use.
3. The Charcoal Filter RK-260 is also sold as an accessory. See Page 14 for ordering information.

**B) HORIZONTAL EXHAUST: OUTSIDE VENTILATION**
1. Remove 2 screws from back edge and 3 screws from the top center of Fan Cover Bracket. Save 2 screws to be used later and discard remaining 3. Remove Fan Cover Bracket by sliding it in the opposite direction of the arrow on the Fan Cover Bracket, as shown in Figure 7.
2. Lift Hood Fan Unit carefully and slip wires out of cavity. See Figure 8. **CAUTION:** Do not pull or stretch hood fan wiring.
3. Rotate the Hood Fan Unit 180° so that the fan blade openings are facing the back of the oven. See Figure 9 (A). Replace Hood Fan Unit into the oven. Be careful not to pinch the wire and the Hood Fan Unit. See Figure 9 (B).
4. Put the wire back into the cavity. See Figure 10.
UNPACKING AND INSTALLATION INSTRUCTIONS

(C) VERTICAL EXHAUST: OUTSIDE VENTILATION

1. Remove and save 2 screws from back edge and 3 screws from the top center of the Fan Cover Bracket. Remove Fan Cover Bracket by sliding it in the opposite direction of the arrow on the Fan Cover Bracket as shown in Figure 11.

2. Lift Hood Fan Unit carefully and slip wires out of cavity. See Figure 12. CAUTION: Do not pull or stretch hood fan wiring.

3. Rotate the Hood Fan Unit 90° so that the fan blade openings are facing the top of the oven. See Figure 13 (A). Replace Hood Fan Unit into the oven. Be careful not to pinch the lead wire between the inner bracket and the Hood Fan Unit. Put the lead wire into Wire Box. See Figure 13 (B).

4. Replace the Fan Cover Bracket by sliding it into the slits in the same direction as the arrow on the Fan Cover Bracket. Make sure the fan blades are visible through the top openings in the oven before proceeding.

5. Attach the Fan Cover Bracket to unit with the 2 screws from back edge and 3 screws from the top center of the Fan Cover Bracket, which were removed in Step 1 above. See Figure 14. The Hood Fan Unit is now rotated for vertical exhaust operation.

6. Attach the Exhaust Damper Assembly to the fan cover on the top of the outercase cabinet by sliding it into the slits in the same direction as the arrow. Use 1 Tapping Screw 4 x 12 mm from the INSTALLATION HARDWARE and tighten into place. See Figure 15.
UNPACKING AND INSTALLATION INSTRUCTIONS

9 OVEN INSTALLATION

THIS OVEN CANNOT BE PROPERLY INSTALLED WITHOUT REFERRING TO THE MOUNTING INSTRUCTIONS FOUND ON WALL AND TOP CABINET TEMPLATES.

THE NEXT STEP IS TO READ AND FOLLOW MOUNTING INFORMATION ON WALL AND TOP CABINET TEMPLATES. THIS OVEN MUST BE ATTACHED TO AT LEAST ONE WALL STUD. SEE WALL CONSTRUCTION ON PAGE 6.

WHEN DONE WITH TEMPLATES, PROCEED TO MOUNTING SCALE PLATE SECTION.

MOUNTING SCALE PLATE

Attach 2 Scale Plates with tape (not included). See Figure 16 and WALL TEMPLATE for locations.

**Figure 16**

[Diagram of Mounting Plate and Scale Plates]

MOUNTING PLATE

1. Separate 4 Toggle Bolts, packed in the INSTALLATION HARDWARE, from the Toggle Nuts.
2. Match 5/8" holes (not in studs), drilled through WALL TEMPLATE into wall to corresponding holes on Mounting Plate.
3. Insert Toggle Bolts into matched openings on Mounting Plate. Put Toggle Nuts on Toggle Bolts. See Figure 17.
4. Position the Mounting Plate with the Toggle Bolts attached at the wall location and insert Toggle Nuts and Bolts through the holes in the wall with the Toggle Nuts closed. Figure 18. Use Wood Screws to attach the Mounting Plate to studs.

NOTE: Before insertion, be sure you leave a space more than the thickness of the wall between the Mounting Plate and the end of each of the Toggle Nuts (in the closed position). If you do not leave enough space, the Toggle Nut will not be able to open on the other side of the wall. Also, once a Toggle Nut opens, it cannot be withdrawn from the hole; therefore make sure all of the Toggles are in the correct position before insertion.

5. Align the Mounting Plate carefully and hold in position while tightening Toggle Bolts. Pull Toggle Bolt toward you and turn clockwise to tighten. Figure 19.

10 PREPARATION AND USE OF THE CARTON TO ASSIST IN THE INSTALLATION OF THE MICROWAVE OVEN

Utilization of the carton may make installation easier.

1. Place carton upside down. See Figure 20.

2. Using cutting line around the carton, cut into two pieces (A) and (B). See Figure 21.

3. Position oven to assist in mounting to the wall. See Figure 22.

Figure 20

Figure 21

Figure 22
UNPACKING AND INSTALLATION INSTRUCTIONS

MOUNTING OVEN TO THE WALL
Two people are recommended to attach the Microwave Oven/Hood to the Mounting Plate.

1. Thread the Power Supply Cord through the hole made in the bottom of the top cabinet. Install the oven by snapping it onto the Mounting Plate. See Figure 23.

2. Use two Tapping Screws 5 to secure the levers that are on the bottom of the oven. See Figure 24.

3. Use two Top Cabinet Screws ③ and two Flat Washers ⑥, supplied in the INSTALLATION HARDWARE, to attach the unit to the top cabinet. See Figure 25.

4. Make a bundle of the Power Supply Cord and attach it to the inside of the cabinet using the Power Cord Hanger ④. See Figure 25.

5. Attach the bottom sash ⑫ to the oven by sliding the two tabs into the rectangular openings located on the bottom front of the oven. See figure 26 (A).

6. Use 5 Tapping Screws 4 x 12 mm ⑤ from the INSTALLATION HARDWARE and tighten into place. See Figure 26 (B).

CHECKLIST FOR INSTALLATION
1. Make sure the unit has been installed according to all of the Installation Instructions and the Wall and Top Cabinet Templates.
2. Plug in the power cord.

OPTIONAL ACCESSORIES
Two optional accessories are available for this oven.

1. Charcoal Filter (RK-260). This is required when hood exhaust is recirculated. See Charcoal Filter on page 31. If dealer does not stock this item, it can be ordered by calling 1-800-642-2122.

2. Filler Panel Kit. For use when the oven is installed in a 36-inch or 42-inch wide opening. The metal filler panels come in 3-inch wide pairs. One set is needed for a 36-inch opening and 2 sets for a 42-inch opening. White, black, stainless and bisque are available.

ABOUT YOUR OVEN

This Operation Manual is valuable: read it carefully and always save it for reference.

A good microwave cookbook is a valuable asset. Check it for microwave cooking principles, techniques, hints and recipes. See pages 32 and 33 for ordering the Sharp Carousel Microwave Cookbook.

ALWAYS have food in the oven when it is on to absorb the microwave energy.

When using the oven at power levels below 100%, you may hear the magnetron cycling on and off. It is normal for the exterior of the oven to be warm to the touch when cooking or reheating.

Condensation is a normal part of microwave cooking. Room humidity and the moisture in food will influence the amount of moisture that condenses in the oven. Generally, covered foods will not cause as much condensation as uncovered ones. Ventilation openings must not be blocked.

The oven is for food preparation only. It should not be used to dry clothes or newspapers.

Your oven is rated 1200 watts by using the IEC Test Procedure. In using recipes or package directions, check food a minute or two before the minimum time and add time accordingly.

| Baby food | • Transfer baby food to small dish and heat carefully, stirring often. Check temperature before serving.  
• Put nipples on bottles after heating and shake thoroughly. “Wrist” test before feeding. | • Heat disposable bottles.  
• Heat bottles with nipples on.  
• Heat baby food in original jars. |
| General | • Cut baked goods with filling after heating to release steam and avoid burns.  
• Stir liquids briskly before heating and allow to stand 20 seconds after heating before stirring or drinking to avoid eruption.  
• Use deep bowl, when cooking liquids or cereals, to prevent boil overs. | • Heat or cook in closed glass jars or air tight containers.  
• Can in the microwave as harmful bacteria may not be destroyed.  
• Deep fat fry.  
• Dry wood, gourds, herbs or wet papers. |
ABOUT UTENSILS AND COVERINGS

The following coverings are ideal:

- Paper towels are good for covering foods for reheating and absorbing fat while cooking bacon.
- Wax paper can be used for cooking and reheating.
- Plastic wrap that is specially marked for microwave use can be used for cooking and reheating. DO NOT allow plastic wrap to touch food. Vent so steam can escape.
- Lids that are microwave-safe are a good choice because heat is kept near the food to hasten cooking.
- Oven cooking bags are good for large meats or foods that need tenderizing. DO NOT use metal twist ties. Remember to slit bag so steam can escape.

How to use aluminum foil in your microwave oven:

- Small flat pieces of aluminum foil placed smoothly on the food can be used to shield areas that are either defrosting or cooking too quickly.
- Foil should not come closer than one inch to any surface of the oven.

These items can be used for short time reheating of foods that have little fat or sugar in them:

- wood, straw, wicker

DO NOT USE

- metal pans and bakeware
- dishes with metallic trim
- non-heat-resistant glass
- non-microwave-safe plastics (margarine tubs)
- recycled paper products
- brown paper bags
- food storage bags
- metal twist-ties

Should you wish to check if a dish is safe for microwaving, place the empty dish in the oven and microwave on HIGH for 30 seconds. A dish which becomes very hot should not be used.

ABOUT CHILDREN AND THE MICROWAVE

Children below the age of 7 should use the microwave oven with a supervising person very near to them. Between the ages of 7 and 12, the supervising person should be in the same room.

The child must be able to reach the oven comfortably; if not, he/she should stand on a sturdy stool.

At no time should anyone be allowed to lean or swing on the oven door.

Children should be taught all safety precautions: use potholders, remove coverings carefully, pay special attention to packages that crisp food because they may be extra hot.

Don’t assume that because a child has mastered one cooking skill he/she can cook everything.

Children need to learn that the microwave oven is not a toy. See page 28 for Child Lock feature.

INFORMATION YOU NEED TO KNOW

It is not necessary to buy all new cookware. Many pieces already in your kitchen can be used successfully in your new microwave oven. Make sure the utensil does not touch the interior walls during cooking.

Use these utensils for safe microwave cooking and reheating:

- glass ceramic (Pyroceram®), such as Corningware®.
- heat-resistant glass (Pyrex®)
- microwave-safe plastics
- paper plates
- microwave-safe pottery, stoneware and porcelain
- browning dish (Do not exceed recommended preheating time. Follow manufacturer’s directions.)

ACCESSORIES

There are many microwave accessories available for purchase. Evaluate carefully before you purchase so that they meet your needs. A microwave-safe thermometer will assist you in determining correct doneness and assure you that foods have been cooked to safe temperatures. Sharp is not responsible for any damage to the oven when accessories are used.

Should you have questions about utensils or coverings, check a good microwave cookbook or follow recipe suggestions.
ABOUT MICROWAVE COOKING

- Arrange food carefully. Place thickest areas towards outside of dish.
- Watch cooking time. Cook for the shortest amount of time indicated and add more as needed. Food severely overcooked can smoke or ignite.
- Cover foods while cooking. Check recipe or cookbook for suggestions: paper towels, wax paper, microwave plastic wrap or a lid. Covers prevent spattering and help foods to cook evenly.
- Shield with small flat pieces of aluminum foil any thin areas of meat or poultry to prevent overcooking before dense, thick areas are cooked thoroughly.
- Stir foods from outside to center of dish once or twice during cooking, if possible.
- Turn foods over once during microwaving to speed cooking of such foods as chicken and hamburgers. Large items like roasts must be turned over at least once.
- Rearrange foods such as meatballs halfway through cooking both from top to bottom and from the center of the dish to the outside.
- Add standing time. Remove food from oven and stir, if possible. Cover for standing time which allows the food to finish cooking without overcooking.
- Check for doneness. Look for signs indicating that cooking temperatures have been reached.
  
  **Doneness signs include:**
  - Food steams throughout, not just at edge.
  - Center bottom of dish is very hot to the touch.
  - Poultry thigh joints move easily.
  - Meat and poultry show no pinkness.
  - Fish is opaque and flakes easily with a fork.

ABOUT SAFETY

- Check foods to see that they are cooked to the United States Department of Agriculture's recommended temperatures.

To test for doneness, insert a meat thermometer in a thick or dense area away from fat or bone. NEVER leave the thermometer in the food during cooking, unless it is approved for microwave oven use.

- ALWAYS use potholders to prevent burns when handling utensils that are in contact with hot food. Enough heat from the food can transfer through utensils to cause skin burns.
- Avoid steam burns by directing steam away from the face and hands. Slowly lift the farthest edge of a dish's covering and carefully open popcorn and oven cooking bags away from the face.
- Stay near the oven while it's in use and check cooking progress frequently so that there is no chance of overcooking food.
- NEVER use the cavity for storing cookbooks or other items.
- Select, store and handle food carefully to preserve its high quality and minimize the spread of foodborne bacteria.
- Use care when removing items from the oven so that the utensil, your clothes or accessories do not touch the safety door latches.

PART NAMES

CONTROL PANEL

Words in the lower portion of the display will light to indicate what function is in progress.

Number next to the control panel illustration indicates pages on which there are feature descriptions and usage information.
BEFORE OPERATING

• Before operating your new microwave oven make sure you read and understand this operation manual completely.

• Before the oven can be used, follow these procedures:

1. Plug in the oven. Close the door. The oven display will show **ERROR**.
2. Touch the STOP/CLEAR pad. **ERROR** will appear.
3. Set clock.

TO SET THE CLOCK

• Suppose you want to enter the correct time of day 12:30 (A.M. or P.M.).

This is a 12 hour clock. If you attempt to enter an incorrect clock time, **ERROR** will appear in the display. Touch the STOP/CLEAR pad and re-enter the time.

• If the electrical power supply to your microwave oven should be interrupted, the display will intermittently show **ERROR** after the power is reinstated. If this occurs during cooking, the program will be erased. The time of day will also be erased. Simply touch STOP/CLEAR pad and reset the clock for the correct time of day.

NOTE: Your oven can be programmed with the door open except for using START/MINUTE PLUS, KEEP WARM and POPCORN.

STOP/CLEAR

Touch the STOP/CLEAR pad to:

1. Erase if you make a mistake during programming.
2. Cancel timer.
3. Stop the oven temporarily during cooking.
4. Return the time of day to the display.
5. Cancel a program during cooking, touch twice.
**MANUAL OPERATION**

**TIME COOKING**

Your oven can be programmed for 99 minutes 99 seconds (99.99). Always enter the seconds after the minutes, even if they are both zeros.

**USING THE RACK**

The rack allows several foods to be cooked or reheated at one time. There are two available rack positions. Select the rack position that maximizes space around and between the foods. Set time and power level manually. Pay close attention to the cooking/reheating progress. Reposition the foods and reverse them from rack to oven bottom at least once during any cooking or reheating time. Using a lower power level will assist in better cooking/reheating uniformity.

**AVOID:**

- Storing the rack in the microwave oven when not in use.
- Popping popcorn with the rack in the microwave oven.
- Using any browning dish on the rack.
- Using special features, with the rack.
- Cooking directly on the rack—use microwave-safe cookware.

**TO SET POWER LEVEL**

There are eleven preset power levels.

Using lower power levels increases the cooking time which is recommended for foods such as cheese, milk and long slow cooking of meats. Consult cookbook or recipes for specific recommendations.

**SPECIAL FEATURES**

Your oven has 3 convenient pads to assist with meal preparation. Quick Breakfast, Snack Time and Dinner Favorites will automatically compute the correct cooking time and microwave power level for foods shown in the following charts.

**NOTE FOR SPECIAL FEATURES:**

1. All features in this section can be programmed with More or Less Time Adjustment. Touch the POWER LEVEL pad once or twice before touching START/MINUTE PLUS pad. See page 29.

2. Each food has a cooking hint. Touch CUSTOM HELP pad when the HELP indicator is lighted in the display.

3. Should you attempt to enter more or less than the allowed amount, an error message will appear in the display.

   More or less than the quantity listed in the chart should be cooked following the guidelines in any microwave cookbook.

4. The final cooking result will vary according to the food condition (e.g. initial temperature, shape, quality). Check food for temperature after cooking. If additional time is needed, continue to cook manually.

NOTE: Check foods when oven signals. After final stage, small sections may still be icy. Let stand to continue thawing. Do not defrost until all ice crystals are thawed.

Shielding prevents cooking from occurring before the center of the food is defrosted. Use small smooth strips of aluminum foil to cover edges and thinner sections of the food.
SPECIAL FEATURES

KEEP WARM
KEEP WARM allows you to keep food warm for 15 minutes.

DIRECT USE
• Suppose you want to keep a cup of soup warm for 15 minutes.

PROCEDURE
1  KEEP WARM  Touch KEEP WARM pad.

The oven will start automatically. The display will show KEEP and count down. KEEP WARM will be displayed during the countdown.

NOTE:
1. Keep Warm cannot be programmed with special features.
2. For Auto Start cooking, this feature cannot be used alone, but in conjunction with sequence cooking.

WITH MANUAL COOKING
• Suppose you want to cook a cup of soup for 2 minutes at 70% and keep the soup warm for 15 minutes.

PROCEDURE  
DISPLAY

CUSTOM HELP

CUSTOM HELP provides 4 features that make using your oven easy because specific instructions are provided in the interactive display.

1. CHILD LOCK
The CHILD LOCK prevents unwanted oven operation such as by small children. The oven can be set so that the control panel is deactivated or locked. To set, touch CUSTOM HELP, the number 1 and then touch the START/MINUTE PLUS pad. Should a pad be touched, CHILD LOCK ON will appear in the display.

To cancel, touch CUSTOM HELP and STOP/CLEAR pad.

2. AUDIBLE SIGNAL ELIMINATION
If you wish to have the oven operate with no audible signals, touch CUSTOM HELP, the number 2 and STOP/CLEAR.

To cancel and restore the audible signal, touch CUSTOM HELP, the number 2 and START/MINUTE PLUS.

3. AUTO START
If you wish to program your oven to begin cooking automatically at a designated time of day, follow this procedure:
   • Suppose you want to start cooking a stew for 20 minutes on 50% at 4:30. Before setting, check to make sure the clock is showing the correct time of day.

   **PROCEDURE**
   1 Touch CUSTOM HELP pad.
   2 Touch number 3.
   3 Enter the start time. 4 3 0
   4 Touch CLOCK pad.
   5 Enter time. Touch POWER LEVEL pad six times for 50% power. 2 0 0 0
   6 Touch START/MINUTE PLUS pad.

**NOTE:**
1. Auto Start can be used for manual cooking if clock is set.
2. If the oven door is opened after programming Auto Start, it is necessary to touch the START/MINUTE PLUS pad for Auto Start time to appear in the readout so that the oven will automatically begin programmed cooking at the chosen Auto Start time.
3. Be sure to choose foods that can be left in the oven safely until the Auto Start time. Acorn or butternut squash are often a good choice.
4. If you wish to know the time of day, simply touch the TIMER/CLOCK pad. As long as your finger is touching the TIMER/CLOCK pad, the time of day will be displayed.

4. LANGUAGE SELECTION
The oven comes set for English and U.S. Customary Unit-pounds. To change, touch CUSTOM HELP and the number 4. Continue to touch the number 4 until your choice is selected from the table below. Then, touch START/MINUTE PLUS pad.

MINUTE PLUS

MINUTE PLUS allows you to cook for a minute at 100% by simply touching the START/MINUTE PLUS pad. You can also extend cooking time in multiples of 1 minute by repeatedly touching the START/MINUTE PLUS pad during manual cooking.

   • Suppose you want to heat a cup of soup for one minute.

   **PROCEDURE**
   1 Touch START/MINUTE PLUS pad.

**NOTE:**
1. To use MINUTE PLUS, touch pad within 3 minutes after cooking, closing the door, touching the STOP/CLEAR pad or during cooking.
2. Minute Plus cannot be used with special features.

HELP

Each setting has a cooking hint. If you wish to check, touch CUSTOM HELP whenever HELP is lighted in the Interactive Display for these and other manual operation hints.
OTHER CONVENIENT FEATURES

DEMONSTRATION MODE

To demonstrate, touch TIMER/CLOCK, the number 0 and then touch the START/MINUTE PLUS pad and hold for three seconds. [DEMO ON] will appear in the display. Cooking operations and specific special features can now be demonstrated with no power in the oven. For example, touch MINUTE PLUS pad and the display will show END and count down quickly to END.

To cancel, touch TIMER/CLOCK, the number 0 and STOP/CLEAR pads. If easier, unplug the oven from the electrical outlet and replug.

MULTIPLE SEQUENCE COOKING

Your oven can be programmed for up to 3 automatic cooking sequences, switching from one power level setting to another automatically.

Sometimes cooking directions tell you to start on one power level and then change to a different power level. Your oven can do this automatically.

• Suppose you want to cook roast beef for 5 minutes at 100% and then continue to cook for 30 minutes at 50%.

PROCEDURE

1 First enter cooking time. Then touch POWER LEVEL pad once for 100% power.

2 Then enter second cooking time. Touch POWER LEVEL pad six times for 50% power.

3 Touch START/MINUTE PLUS pad.

NOTE:

1. If POWER LEVEL pad is touched, [HIGH] will be displayed.
2. If 100% is selected as the final sequence, it is not necessary to touch the POWER LEVEL pad.
3. KEEP WARM can be programmed even if 3 cooking sequences have been set.

MORE OR LESS TIME ADJUSTMENT

Should you discover that you like any of the Quick Breakfast, Snack Time, Dinner Favorites, Popcorn, Short Cuts or Easy Defrost settings slightly more done, touch the POWER LEVEL pad once after touching your choice of pads or before touching START/MINUTE PLUS pad.

The display will show MORE.

Should you discover that you like any of the Quick Breakfast, Snack Time, Dinner Favorites, Popcorn, Short Cuts or Easy Defrost settings slightly less done, touch the POWER LEVEL pad twice after touching your choice of pads or before touching START/MINUTE PLUS pad.

The display will show LESS.

TIMER

• Suppose you want to time a 3-minute long distance phone call.

PROCEDURE DISPLAY

1 Touch Timer/ Clock pad and number 1.

2 Enter time.

3 Touch Timer/ Clock pad. The timer will count down. To cancel the timer, touch the Stop/Clear pad once.

LIGHT HI/LO

Press the LIGHT HI/LO button one time for high, twice for low and three times to turn off.

FAN HI/LO

The fan will automatically start when heat rises from range surface units or burners. This protects the microwave oven from excessive temperature rise. The fan will stay on until the temperature decreases. It cannot be turned off manually during this time.

For other uses, press FAN HI/LO button one time for high, twice for low and three times to turn off.
CLEANING AND CARE

Disconnect the power cord before cleaning or leave the door open to inactivate the oven during cleaning.

Exterior
The outside surface is precoated steel and plastic. Clean the outside with mild soap and water; rinse and dry with a soft cloth. Do not use any type of household or abrasive cleaner.

Door
Be careful with the edge of the oven door as it is glass and could chip or break. Wipe the window on both sides with a damp cloth to remove any spills or spatters. Metal parts will be easier to maintain if wiped frequently with a damp cloth. Avoid the use of spray and other harsh cleaners as they may stain, streak or dull the door surface.

Touch Control Panel
Wipe the panel with a cloth dampened slightly with water only. Dry with a soft cloth. Do not scrub or use any sort of chemical cleaners. Close door and touch STOP/CLEAR.

Interior
Cleaning is easy because little heat is generated to the interior surfaces; therefore, there is no baking and setting of spills or spattering. To clean the interior surfaces, wipe with a soft cloth and warm water. DO NOT USE ABRASIVE OR HARSH CLEANERS OR SCOURING PADS. For heavier soil, use baking soda or a mild soap; rinse thoroughly with hot water. The rack can be cleaned with hot soapy water, rinsed and dried.

Odor Removal
Occasionally, a cooking odor may remain in the oven. To remove, combine 1 cup water, grated peel and juice of 1 lemon and several whole cloves in a 2-cup glass measuring cup. Boil for several minutes using 100% power. Allow to set in oven until cool. Wipe interior with a soft cloth.

Grease Filters
Filters should be cleaned at least once a month. Never operate the fan or oven without the filters in place.
1. Pull down slightly on the tab toward the center of the oven and remove the filter. Repeat for the other filter.
2. Soak the filters in a sink or dish pan filled with hot water and detergent. DO NOT use ammonia or other alkali; they will react with the filter material and darken it.
3. Agitate and scrub with a brush to remove embedded dirt.
4. Rinse thoroughly and shake dry.
5. Replace by fitting the filter back into the opening.

Disconnect the power cord before cleaning or leave the door open to inactivate the oven during cleaning.
**REPLACING PARTS**

**CHARCOAL FILTER**

Charcoal Filter, Sharp part number RK-260 which was installed in your oven, is used for nonvented, recirculated installation. The filter should be changed every 6 to 12 months depending on use. See page 14 for ordering information.

1. Disconnect power to the oven at the circuit breaker panel or by unplugging.

2. Remove the three louver mounting screws and push down carefully on the tab at each end of the louver to disengage it. (See illustration.)

3. Pull the louver away from the unit.

4. Change the charcoal filter.

5. Carefully push the louver back into place (engaging both the bottom and top tabs) and replace the screws removed in step 2.

**LIGHT BULBS**

1. To replace light bulbs, first disconnect power to the oven at the circuit breaker panel or by unplugging.

2. To release cover, remove the screw on the light cover. (See illustration.)

3. Replace light bulbs with equivalent watt bulb available from your Sharp Authorized Servicer or parts distributor. Bulbs are also available at most hardware stores or lighting centers. DO NOT USE A BULB LARGER THAN 30 WATTS.

**CAUTION:** Light cover may become very hot. Do not touch glass when light is on.
SERVICES CALL CHECK

Please check the following before calling for service:

Place one cup of water in a glass measuring cup in the oven and close the door securely.
Operate the oven for one minute at HIGH 100%.

A  Does the oven light come on?    YES _____ NO _____

B  Does the cooling fan work?     YES _____ NO _____
   (Put your hand over the left side of louver.)

C  Is the water in the oven warm?    YES _____ NO _____

If “NO” is the answer to any of the above questions, please check electrical outlet, fuse and/or circuit breaker. If they are functioning properly, CONTACT YOUR NEAREST SHARP AUTHORIZED SERVICER. A microwave oven should never be serviced by a “do-it-yourself” repair person.

NOTE: If time appearing in the display is counting down very rapidly, check Demonstration Mode on page 29 and cancel.
