PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

(a) Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.

(b) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.

(c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the: (1) door (bent), (2) hinges and latches (broken or loosened), (3) door seals and sealing surfaces.

(d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.
The product information card should be completed within ten days of purchase and returned. We will keep it on file and help you access the information in case of loss, damage or theft. This will also enable us to contact you in the unlikely event that any adjustments or modifications are ever required for your oven.

TO OBTAIN SUPPLY, ACCESSORY OR PRODUCT INFORMATION,
CALL 1-800-BE-SHARP OR VISIT www.sharp-usa.com.
SAVE THE PROOF OF PURCHASE AS IT IS NEEDED SHOULD YOUR OVEN EVER REQUIRE WARRANTY SERVICE.

PRODUCT INFORMATION CARD

The product information card should be completed within ten days of purchase and returned. We will keep it on file and help you access the information in case of loss, damage or theft. This will also enable us to contact you in the unlikely event that any adjustments or modifications are ever required for your oven.
When using electrical appliances, basic safety precautions should be followed, including the following:

**WARNING** - To reduce the risk of burns, electric shock, fire, injury to persons or exposure to excessive microwave energy:

1. Read all instructions before using the appliance.
2. Read and follow the specific “PRE-C AUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY” on page 2.
3. This appliance must be grounded. Connect only to properly grounded outlet. See “GROUNDING INSTRUCTIONS” on page 5.
4. Install or locate this appliance only in accordance with the provided installation instructions.
5. Some products such as whole eggs and sealed containers — for example, closed glass jars — may explode and should not be heated in this oven.
6. Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat, cook or dry food. It is not designed for industrial or laboratory use.
7. As with any appliance, close supervision is necessary when used by children.
8. Do not operate this appliance if it has a damaged cord or plug, if it is not working properly or if it has been damaged or dropped.
9. This appliance should be serviced only by qualified service personnel. Contact nearest Sharp Authorized Servicer for examination, repair or adjustment.
10. Do not cover or block any openings on the appliance.
11. Do not store or use this appliance outdoors. Do not use this product near water—for example, near a kitchen sink, in a wet basement or near a swimming pool, and the like.
12. Do not immerse cord or plug in water.
13. Keep cord away from heated surfaces.
14. Do not let cord hang over edge of table or counter.
15. See door surface cleaning instructions on page 33.
16. To reduce the risk of fire in the oven cavity:
   a. Do not overcook food. Carefully attend appliance if paper, plastic or other combustible materials are placed inside the oven to facilitate cooking.
   b. Remove wire twist-ties from paper or plastic bags before placing bag in oven.
   c. If materials inside the oven should ignite, keep oven door closed, turn oven off, and disconnect the power cord or shut off power at the fuse or circuit breaker panel.
   d. Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils or food in the cavity when not in use.
17. If the oven is installed as a built-in, observe the following instructions:
   a. Do not operate any heating or cooking appliance beneath this appliance.
   b. Do not mount unit over or near any portion of a heating or cooking appliance.
   c. Do not mount over a sink.
   d. Do not store anything directly on top of the appliance surface when the appliance is in operation.
18. If the oven light fails, consult a SHARP AUTHORIZED SERVICER.

**SAVE THESE INSTRUCTIONS**
Unpacking and Examining Your Oven

Remove:
1. all packing materials from inside the oven cavity, however, DO NOT REMOVE THE WAVEGUIDE COVER, which is located on the right cavity wall. Read enclosures and SAVE the Operation Manual.
2. the feature sticker from the outside of the door, if there is one.

Check the oven for any damage, such as misaligned or bent door, damaged door seals and sealing surfaces, broken or loose door hinges and latches and dents inside the cavity or on the door. If there is any damage, do not operate the oven and contact your dealer or SHARP AUTHORIZED SERVICER.

Choosing a Location for Your Oven

You will use the oven frequently so plan its location for ease of use. It’s wise, if possible, to have counter space on at least one side of the oven. Allow at least 2 inches on the sides, top and at the rear of the oven for air circulation.

Do not place or install the oven in any area where heat and steam are generated; for example, next to or above a conventional gas or electric range or above a conventional wall oven. Heat and steam may damage the electronics or the mechanical parts of the oven.

Built-In Kit

Your oven can be built into a cabinet or wall—not near or above a heat source—using Sharp’s Built-in Kit RK-51 for the R-540DK and the RK-51W for the R-540DW; the RK-46K for the R-440DK and the RK-46W for the R-440DW. If your dealer does not stock the kit, it can be ordered directly from the Sharp Accessories and Supplies Center. Have your credit card available and call toll-free: 1-800-642-2122 for ordering the kit to be sent to your address. The kit includes ducts and finish trim strips and easy-to-follow instructions for installation as well as the location of the power supply.

GROUNDING INSTRUCTIONS

This appliance must be grounded. This oven is equipped with a cord having a grounding wire with a grounding plug. It must be plugged into a wall receptacle that is properly installed and grounded in accordance with the National Electrical Code and local codes and ordinances. In the event of an electrical short circuit, grounding reduces risk of electric shock by providing an escape wire for the electric current.

WARNING – Improper use of the grounding plug can result in a risk of electric shock.

Electrical Requirements

The electrical requirements are a 120 volt 60 Hz, AC only, 15 amps. or more protected electrical supply. It is recommended that a separate circuit serving only this appliance be provided.

The oven is equipped with a 3-prong grounding plug. It must be plugged into a wall receptacle that is properly installed and grounded. Should you only have a 2-prong outlet, have a qualified electrician install a correct wall receptacle.

A 3-prong adapter may be purchased and used temporarily if local codes allow. Follow package directions.

A short power-supply cord is provided to reduce risk of becoming entangled in or tripping over a longer cord.

Extension Cord

If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade grounding plug and a 3-slot receptacle that will accept the plug on the microwave oven. The marked rating of the extension cord should be AC 115-120 volt, 15 amps. or more.

Be careful not to drape the cord over the countertop or table where it can be pulled on by children or tripped over accidentally.

Notes:

1. If you have any questions about the grounding or electrical instructions, consult a qualified electrician or serviceperson.

2. Neither Sharp nor the dealer can accept any liability for damage to the oven or personal injury resulting from failure to observe the correct electrical connection procedures.

Radio or TV Interference

Should there be any interference caused by the microwave oven to your radio or TV, check that the microwave oven is on a different electrical circuit, relocate the radio or TV as far away from the oven as feasible or check position and signal of receiving antenna.
INFORMATION YOU NEED TO KNOW

ABOUT YOUR OVEN

This Operation Manual is valuable: read it carefully and always save it for reference.

A good microwave cookbook is a valuable asset. Check it for microwave cooking principles, techniques, hints and recipes. See pages 31 and 32 for ordering the Ultimate Accessory, the SHARP CAROUSEL MICROWAVE COOKBOOK.

NEVER use the oven without the turntable and support nor turn the turntable over so that a large dish could be placed in the oven. The turntable will turn both clockwise and counterclockwise.

ALWAYS have food in the oven when it is on to absorb the microwave energy.

When using the oven at power levels below 100%, you may hear the magnetron cycling on and off.

Condensation is a normal part of microwave cooking. Room humidity and the moisture in food will influence the amount of moisture that condenses in the oven. Generally, covered foods will not cause as much condensation as uncovered ones. Vents on the oven back must not be blocked.

The oven is for food preparation only. It should not be used to dry clothes or newspapers.

Your oven is rated 1200 watts by using the IEC Test Procedure. In using recipes or package directions, check food a minute or two before the minimum time and add time accordingly.

INFORMATION YOU NEED TO KNOW

ABOUT UTENSILS AND COVERINGS

It is not necessary to buy all new cookware. Many pieces already in your kitchen can be used successfully in your new microwave oven.

Use these utensils for safe microwave cooking and reheating:

- glass ceramic (Pyroceram®), such as Corningware®
- heat-resistant glass (Pyrex®)
- microwave-safe plastics (some microwave-safe plastics are not suitable for cooking foods with high fat and sugar content.)
- paper plates
- microwave-safe pottery, stoneware and porcelain
- browning dish (Do not exceed recommended preheating time. Follow manufacturer's directions.)

These items can be used for short time reheating of foods that have little fat or sugar in them:

- wood, straw, wicker

The following coverings are ideal:

- Paper towels are good for covering foods for reheating and absorbing fat while cooking bacon.
- Wax paper can be used for cooking and reheating.
- Plastic wrap that is specially marked for microwave use can be used for cooking and reheating. DO NOT allow plastic wrap to touch food. Vent so steam can escape.
- Lids that are microwave-safe are a good choice because heat is kept near the food to hasten cooking.
- Oven cooking bags are good for large meats or foods that need tenderizing. DO NOT use metal twist ties. Remember to slit bag so steam can escape.

How to use aluminum foil in your microwave oven:

- Small flat pieces of aluminum foil placed smoothly on the food can be used to shield areas that are either defrosting or cooking too quickly.
- Foil should not come closer than one inch to any surface of the oven.

Should you have questions about utensils or coverings, check a good microwave cookbook or follow recipe suggestions.

ACCESSORIES

There are many microwave accessories available for purchase. Evaluate carefully before you purchase so that they meet your needs. A microwave-safe thermometer will assist you in determining correct doneness and assure you that foods have been cooked to safe temperatures. Sharp is not responsible for any damage to the oven when accessories are used.

It is not necessary to buy all new cookware. Many pieces already in your kitchen can be used successfully in your new microwave oven.

DO NOT USE

- metal pans and bakeware
- dishes with metallic trim
- non-heat-resistant glass
- non-microwave-safe plastics (margarine tubs)
- recycled paper products
- brown paper bags
- food storage bags
- metal twist-ties

Should you wish to check if a dish is safe for microwaving, place the empty dish in the oven and microwave on 100% power for 30 seconds. A dish which becomes very hot should not be used.

ABOUT CHILDREN AND THE MICROWAVE

Children below the age of 7 should use the microwave oven with a supervising person very near to them. Between the ages of 7 and 12, the supervising person should be in the same room.

The child must be able to reach the oven comfortably; if not, he/she should stand on a sturdy stool.

At no time should anyone be allowed to lean or swing on the oven door.

Children should be taught all safety precautions: use potholders, remove coverings carefully, pay special attention to packages that crisp food because they may be extra hot.

Don’t assume that because a child has mastered one cooking skill he/she can cook everything.

Children need to learn that the microwave oven is not a toy. See page 28 for Child Lock feature.
INFORMATION YOU NEED TO KNOW

ABOUT MICROWAVE COOKING

• Arrange food carefully. Place thickest areas toward outside of dish.
• Watch cooking time. Cook for the shortest amount of time indicated and add more as needed. Foods severely overcooked can smoke or ignite.
• Cover foods while cooking. Check recipe or cookbook for suggestions: paper towels, wax paper, microwave plastic wrap or a lid. Covers prevent spattering and help foods to cook evenly.
• Shield with small flat pieces of aluminum foil any thin areas of meats or poultry to prevent overcooking before dense, thick areas are cooked thoroughly.
• Stir foods from outside to center of dish once or twice during cooking, if possible.
• Turn foods over once during microwaving to speed cooking of such foods as chicken and hamburgers. Large items like roasts must be turned over at least once.

• Rearrange foods like meatballs halfway through cooking both from top to bottom and from the center of the dish to the outside.
• Add standing time. Remove food from oven and stir, if possible. Cover for standing time which allows the food to finish cooking without overcooking.
• Check for doneness. Look for signs indicating that cooking temperatures have been reached.

Doneness signs include:
  - Food steams throughout, not just at edge.
  - Center bottom of dish is very hot to the touch.
  - Poultry thigh joints move easily.
  - Meat and poultry show no pinkness.
  - Fish is opaque and flakes easily with a fork.

ABOUT SAFETY

• Check foods to see that they are cooked to the United States Department of Agriculture’s recommended temperatures:

</tr>
<tr>
<td>170°F</td>

</tr>
<tr>

<td>... dark meat of poultry.</td>
</tr>
</tbody>
</table>

To test for doneness, insert a meat thermometer in a thick or dense area away from fat or bone. NEVER leave the thermometer in food during cooking, unless it is approved for microwave oven use.

• Always use potholders to prevent burns when handling utensils that are in contact with hot food. Enough heat from the food can transfer through utensils to cause skin burns.

• Avoid steam burns by directing steam away from the face and hands. Slowly lift the farthest edge of a dish’s covering and carefully open popcorn and oven cooking bags away from the face.

• Stay near the oven while it’s in use and check cooking progress frequently so that there is no chance of overcooking food.

• NEVER use the cavity for storing cookbooks or other items.

• Select, store and handle food carefully to preserve its high quality and minimize the spread of foodborne bacteria.

• Keep waveguide cover clean. Food residue can cause arcing and/or fires.

• Use care when removing items from the oven so that the utensil, your clothes or accessories do not touch the safety door latches.

INTRODUCTION TO TOUCH SCREEN

Your new Sharp Smart & Easy Touch Screen Microwave Oven features a large screen on the Control Panel which, not only provides much information to make using the oven easy, but also, is used to input information directly about the food being cooked, quantity or desired doneness.

Example 1: Home Page

The Home Page is the beginning. It shows the time of day, if the clock has been set. It also shows Minute Plus +, where by touching the screen the next screen appears, making it easy to select one of twelve commonly used times. Touching Kitchen Timer tells the oven that the time set is only for timing, not for cooking.

Note that if cooking time is touched on the screen, that Minute Plus + and Kitchen Timer disappear and Power Level appears. Touching Power Level leads to the next screen for selecting the desired Power Level.

Example 2: Suppose you want to cook meat loaf in 6 x 6 NO GUESS COOKING:

1. Press Meat on the Control Panel in 6 x 6 NO GUESS COOKING.
3. Follow directions on the TOUCH SCREEN.

Example 3: Suppose you want to cook Spicy Couscous in More From Your Microwave:

1. Press More From Your Microwave on the Control Panel.
2. Touch One Dish Dinners on the TOUCH SCREEN.
Before operating your new SMART & EASY TOUCH SCREEN microwave oven be sure to read and understand this operation manual.

Before the oven can be used, follow the steps:
1. Plug in the oven. Close the door. You can select either: Video Demo or Set Clock.
2. Touch Set Clock and follow the instructions below.

* Forward and Back Arrows:
On all recipe screens and some preparation screens, there will be forward and back arrows, located in the upper corners of the TOUCH SCREEN. Touch to read the entire recipe before beginning any cooking.

**TO SET THE CLOCK**

- Suppose you want to enter the correct time of day: 12:30 PM.

**NOTE:**
If no choice is made for 30 seconds, the Video Demo will begin automatically. To cancel the Video Demo, press the STOP/CLEAR pad and the display will return to the Home Page. To set the clock, press the Set Up pad, touch Clock and follow the directions on the Touch Screen.

1. After touching Set Clock, enter the time of day (hour) by touching Hour 11 times.
2. Enter the time of day (minutes) by touching 10 Min. 3 times.
3. Select AM or PM and then press the START pad.
4. The clock will start. The display will return to the Home Page.
1. If you make a mistake while setting the clock, touch STOP/CLEAR pad. The Home Page will appear. To set clock again, press Set Up pad on the control panel and Clock/Auto Start. Then touch Clock. Keep touching the screen until the desired time of day appears.

2. If you want to change the setting of the time of day, press Set Up pad and follow the directions.

3. If the electrical power supply to your microwave oven should be interrupted, the screen will intermittently show Video Demo or Set Clock after the power is reinstated. If this occurs during cooking, the program will be erased. Simply touch Set Clock and follow the directions.

4. If you touch continuously the Hour, 10 Min or 1 Min on the Touch Screen, the time will count up automatically.

STOP/CLEAR

Touch the STOP/CLEAR pad to:

1. Return the Home Page to the display, if you make a mistake during programming.

2. Stop the oven temporarily during cooking.

4. Cancel a program during cooking, touch twice.

MANUAL OPERATION

TIME COOKING

Your oven can be programmed for 99 minutes and 99 seconds (99.99). Always enter the seconds after the minutes, even if they are both zeros.

HIGH POWER COOKING

• Suppose you want to cook for five minutes at 100% power:

1. Enter cooking time, 5, 0, 0 by touching numbers. Note the top line of the display. Press the START pad.

2. The display will begin counting down the cooking time. During the cooking, the power level will appear in the display.

NOTE:
If the door is opened or STOP/CLEAR pad is pressed once during cooking process, the cooking time in the display automatically stops. The cooking time starts to count down again when the door is closed and the START pad is pressed.
MULTIPLE SEQUENCE COOKING

The oven can be programmed for up to four automatic cooking sequences, switching from one power level setting to another automatically. Sometimes cooking directions tell you to start on one power level and then change to a different power level. Your oven can do this automatically.

• Suppose you want to cook roast beef for 5 minutes at 70% power and then continue to cook for 30 minutes at 50% power:

1. Enter cooking time, 5, 0, 0 by touching numbers. Touch Power Level.
2. Touch 30%. The top line of the display will show time and chosen power level. Press START pad.
3. The display will begin counting down the cooking time. During the cooking, the power level will appear in the display.

4. Touch Multiple Sequence.
5. Touch 50%. Then press the START pad.
6. The display will begin counting down the total cooking time. During the cooking, the power level will appear in the display.
Sharp's Sensor is a semi-conductor device that detects the vapor (moisture and humidity) emitted from the food as it heats. The sensor adjusts the cooking times and power level for various foods and quantities.

**Using Sensor Settings**

1. After oven is plugged in, wait two minutes before using Sensor Cooking.
2. Be sure the exterior of the cooking container and the interior of the oven are dry. Wipe off any moisture with a dry cloth or paper towel.
3. The oven works with foods at normal storage temperature. For example, popcorn would be at room temperature.
4. Any Sensor Cooking selection can be programmed with More or Less Time Adjustment. See page 30.
5. More or less food than the quantity listed in the chart should be cooked following the guidelines in any microwave cookbook.
6. During the first part of Sensor Cooking, SENSING will appear on the display. Do not open the oven door or press STOP/CLEAR pad during this part of the cooking cycle. The measurement of vapor will be interrupted. If this occurs, an error message will appear. To continue cooking, touch the STOP/CLEAR pad and cook manually.
7. The sensor detects the vapor emitted from the food, remainder of cooking time will appear. The door may be opened when remaining cooking time appears on the display. At this time, you may stir or season food, as desired.
8. If the sensor does not detect vapor properly when cooking or reheating foods, error messages will be displayed, and the oven will turn off.
9. Check food for temperature after cooking. If additional time is needed, continue to cook manually.

**Covering Foods**

Some foods work best when covered. Use the cover recommended in the procedure for these foods.

1. Casserole lid.
2. Plastic wrap: Use plastic wrap recommended for microwave cooking. Cover dish loosely; allow approximately 1/2 inch to remain uncovered to allow steam to escape. Plastic wrap should not touch food.
3. Wax paper: Cover dish completely; fold excess wrap under dish to secure. If dish is wider than paper, overlap two pieces at least one inch to cover.

Be careful when removing any covering to allow steam to escape away from you.

**ONE TOUCH SENSOR**

You can cook or reheat many foods by pressing just one pad. You don't need to calculate cooking time or power level.

- Suppose you want to cook two baked potatoes: Press Baked Potatoes pad and the oven will start automatically. When the sensor detects the vapor emitted from the food, remainder of cooking time will appear, during which the oven door can be opened to add ingredients or check foods.

**NOTE:**

1. After pressing any One Touch Sensor pad, cooking hints will appear for about 7 seconds, during which the door may be opened or STOP/CLEAR pressed. To restart the oven, close the door and press the START pad.
2. All One Touch Sensor pads can be pressed within 3 minutes after cooking, opening and closing the door or pressing the STOP/CLEAR pad.

Your oven has six food pads and each pad has six selections. Many sensor cooked foods are included in 6x6 NO GUESS COOKING. See the sensor cooking information on page 15. For foods not using the sensor, follow the directions on the Touch Screen to enter quantity. When cooking foods with the sensor, it is not necessary to enter quantity or weight. The foods using the sensor are indicated with “*” in the chart on page 17.

**VEGETABLES**

The desired doneness can be selected for any Vegetables choice.

- Suppose you want to cook broccoli (normal):

1. Press the Vegetables pad and then touch the desired vegetable: Broccoli.
2. Touch the desired doneness, and the oven will start automatically. When the sensor detects the vapor emitted from the food, remaining cooking time will appear. The oven door can be opened whenever the count down time is displayed on the Touch Screen.
3. After cooking, follow instructions.

**NOTE:**

You can also start the cooking by pressing the START pad at step 2. At that time “normal” is selected automatically. The doneness can be changed after pressing the START pad by touching the desired doneness on the display within seven seconds.

**MEAT - POULTRY - FISH/SEAFOOD**

**FROZEN FOODS - PASTA GRAINS**

- Suppose you want to cook 1.5 lb meat loaf:

1. Press Meat pad and then touch the desired meat: Meat Loaf.
2. Enter desired weight by touching the screen. Then press the START pad.
3. After cooking, follow instructions.

Enjoy!

Defrost 3+6 pad has two special defrosting methods.

**SUPER DEFROST**

SuperDefrost rapidly defrosts specific foods and weights found in the SuperDefrost chart.

- Suppose you want to defrost 1.0 pound boneless chicken.

1. Press Defrost 3+6 pad and then touch desired food: 1 pound boneless chicken. The oven will start automatically.

2. When the oven stops, read instructions on the screen, open the door, complete the instructions and close the door. Press START pad.

3. After the defrost cycle ends, read the screen. Remove the food from oven, cover and let stand for the suggested time to allow defrosting to be completed.

**NOTE:**

2. SuperDefrost can be programmed with More or Less Time Adjustment. See page 30.

NOTE:
1. You can input the amount only within the range of the COMPU DEFROST CHART.
2. CompuDefrost can be programmed with More or Less Time Adjustment. See page 30.
3. To defrost other foods or foods above or below the weights allowed on COMPU DEFROST CHART, use time and 30% power. See Manual Defrost on page 26.
If the food that you wish to defrost is not listed on the COMPU DEFROST CHART or is above or below the limits in the AMOUNT column on the COMPU DEFROST CHART, you need to defrost manually.

You can defrost any frozen food, either raw or previously cooked, by using 30% power. Follow the exact procedure found on page 14. Estimate defrosting time, enter it. Then touch Power Level on the Touch Screen and select 30%.

For either raw or previously cooked frozen food the rule of thumb is approximately four minutes per pound. For example, defrost four minutes for one pound of frozen spaghetti sauce.

Always stop the oven periodically to remove or separate the portions that are defrosted. If food is not defrosted at the end of the estimated defrosting time, program the oven in one minute increments on 30% power until totally defrosted.

When using plastic containers from the freezer, defrost only long enough to remove from the plastic in order to place in a microwave-safe dish.

The Set Up has six functions.

1. Clock/Auto Start
2. Child Lock
3. Sound Adjustment
4. Language/Weight
5. Video Demo
6. Screen Contrast

To use any function, press Set Up, touch desired function and follow directions on the screen.

1. **CLOCK**

Press the Set Up pad, touch Clock/Auto Start, then Clock and follow the directions on the screen. See page 12.

**AUTO START**

The Auto Start function allows you to set your oven to start automatically at a later time.

• Suppose you want to start cooking a stew for 20 minutes on 50% power at 4:30 P.M. Before setting, check to make sure the clock is showing the correct time of day.

1. Press Set Up pad and then touch the desired function: Clock/Auto Start.

2. Touch Auto Start.

3. Enter start time (4:30) using the screen choices and then touch PM. Press START pad.

4. Enter cooking time, 2, 0, 0, 0 by using numbers on the screen. Touch Power Level.

5. Touch 50%. The top line of the display will show time and chosen power level. Press START pad.

6. Auto Start time will appear.

**NOTE:**

1. Auto Start can be used for manual cooking only, if clock is set.

2. Be sure to choose foods that can be left in the oven safely until the Auto Start time. Acorn or butternut squash are often a good choice.
2. CHILD LOCK
The Child Lock prevents unwanted oven operation such as by small children. The oven can be set so that the control panel is deactivated or locked.

3. SOUND ADJUSTMENT
The oven offers a choice of Simple Beep, Melody or No Sound. The oven comes set for Melody. Touch your choice on the screen and then press START. The selected sound does not change even if the electrical power supply is interrupted. Note that even when No Sound is chosen, there will be a sound for the Kitchen Timer, if it was set.

Reminder:
An audible signal reminds you that cooking, defrosting or reheating has finished. The sound will repeat every 60 seconds and continue for 30 minutes unless you touch STOP/CLEAR or open the door. To set the Reminder, touch On on the End of Cooking Reminder screen. The setting does not change even if the electrical power supply is interrupted. The Reminder cannot be set if “No Sound” was selected.

4. LANGUAGE/WEIGHT
The oven comes set for English and U.S. Customary Unit-pounds. You can also choose English kg, Spanish kg or French kg. To change, press Set Up pad and touch “Language/Weight” and then touch desired language and standard of weight. The selected language/weight will not change even if the electrical power supply is interrupted.

5. VIDEO DEMO
The Video Demo is an automated “tour” through many of the features of the SMART & EASY TOUCH SCREEN oven. You may wish to observe it when the oven is new or when you are teaching family members how to use the oven. There are five short segments in the Video Demo.

6. SCREEN CONTRAST
Normally there is no need to change the display contrast; however, should you wish to do so, touch Lighter or Darker until the contrast is as desired. And then press START pad. Be cautious when touching Lighter so that the display is always readable. The selected contrast will not change even if the electrical power supply is interrupted.

OTHER CONVENIENT FEATURES

MINUTE PLUS
Minute Plus allows you to cook for a minute at 100% power by simply touching the MINUTE PLUS pad. You can also extend cooking time in multiples of one minute by repeatedly touching the MINUTE PLUS pad during manual cooking.

• Suppose you want to heat a cup of soup for one minute using 100% power.

NOTE:
To use Minute Plus, touch pad within three minutes after cooking, closing the door, touching the STOP/CLEAR pad or during cooking.
OTHER CONVENIENT FEATURES

MINUTE PLUS +
Touch Minute Plus + on the screen to access a new screen with 12 common cooking times at 100% power. Touch desired time and the oven starts automatically.

• Suppose you want to melt butter for 30 seconds:

1. Touch Minute Plus +.
2. Touch desired time: 30 seconds.
3. The oven will start automatically.

KITCHEN TIMER
Use this feature as a general purpose timer. You can enter any time up to 99 minutes and 99 seconds. If you want to cancel the timer during the count down phase, simply press STOP/CLEAR and the display will return to the Home Page.

• Suppose you want to time a three minute long distance phone call:

1. Touch Kitchen Timer.
2. Enter desired time by touching numbers: 3, 0, 0. Press START pad.
3. The Kitchen Timer will start counting down.

NOTE:
Even if all sound is off, the oven will beep when the Kitchen Timer ends.
MORE OR LESS TIME ADJUSTMENT

The programmed cooking times are tailored to the most popular tastes. To adjust the cooking time to your individual preference use the “more” or “less” feature to either add or reduce cooking time.

• Suppose you want to cook Ground Beef for more time:

1. Press Meat pad in the 6x6 NO GUESS COOKING and then touch Ground Beef.

2. Prepare the food following the information on the screen. And press START pad.

3. After pressing the START pad, Less Time and More Time will appear. Touch desired choice, if any.

NOTE:

1. Once you have selected either More Time or Less Time, it cannot be changed.

2. Choosing More Time or Less Time must be done within seven seconds after touching START.

SERVICE CALL CHECK

Please check the following before calling for service:

Place one cup of water in a glass measuring cup in the oven and close the door securely.
Operate the oven for one minute at HIGH 100%.

A  Does the oven light come on?  YES ______ NO ______

B  Does the cooling fan work?  YES ______ NO ______
   (Put your hand over the rear ventilating openings.)

C  Does the turntable rotate?  YES ______ NO ______
   It is normal for the turntable to turn in either direction.

D  Is the water in the oven warm?  YES ______ NO ______

If “NO” is the answer to any of the above questions, please check electrical outlet, fuse and/or circuit breaker.
If they are functioning properly, CONTACT YOUR NEAREST SHARP AUTHORIZED SERVICER.
A microwave oven should never be serviced by a “do-it-yourself” repair person.

DOOR
Wipe the window on both sides with a damp cloth to remove any spills or spatters. Metal parts will be easier to maintain if wiped frequently with a damp cloth. Avoid the use of harsh abrasives.

EXTERIOR
The outside surface is painted. Clean the outside with mild soap and water; rinse and dry with a soft cloth. Do not use any type of household or abrasive cleaner.

INTERIOR
Cleaning is easy because no heat is generated to the interior surfaces; therefore, there is no baking and setting of spills or spattering. To clean the interior surfaces, wipe with a soft cloth and warm water. DO NOT USE ABRASIVE OR HARSH CLEANERS OR SCOURING PADS. For heavier soil, use baking soda or a mild soap; rinse thoroughly with hot water. NEVER SPRAY OVEN CLEANERS DIRECTLY ONTO ANY PART OF THE OVEN.

ODOR REMOVAL
Occasionally, a cooking odor may remain in the oven. To remove, combine 1 cup water, grated peel and juice of 1 lemon and several whole cloves in a 2 cup glass measuring cup. Boil for several minutes using 100% power. Allow to set in oven until cool. Wipe interior with a soft cloth.

CONTROL PANEL
Care should be taken in cleaning the control panel. If the control panel becomes soiled, open the oven door before cleaning. Wipe the panel with a cloth dampened slightly with water only. Dry with a soft cloth. Do not scrub or use any sort of chemical cleaners. Close door and touch STOP/CLEAR.

TOUCH SCREEN
Wipe the touch screen with a damp cloth and then dry with a soft cloth. Do not allow soil to accumulate on the touch screen.

TURNTABLE/TURNTABLE SUPPORT
The turntable and turntable support can be removed for easy cleaning. Wash them in mild, sudsy water; for stubborn stains use a mild cleanser and scouring sponge as described above. They are also dishwasher-proof. Use upper rack of dishwasher. The turntable motor shaft is not sealed, so excess water or spills should be wiped up immediately.

WAVEGUIDE COVER
Carefully wash any food particles from the waveguide cover located on the right side in the oven cavity. Do not remove the waveguide cover.
